VOLLEY SKILLS

THE COACHING APP FOR VOLLEYBALL CLUBS

Players. Progress. Together.

Volley Skills replaces the per-player spreadsheet with one app for the whole season: player cards and development plans, physical testing, a shared drill library, live match scouting, team stats and awards.

Phone, tablet and PC

Nothing to install

Built for youth clubs

No ads, no tracking

OVERVIEW

The whole season in one place

Coaches plan, train, test and play in separate tools today: a spreadsheet per player, drills in a notebook, stats on paper. Volley Skills joins it up, so every training, test and match feeds what you know about each player.

1

Player cards

Rosters, 9 skills scored 1–10 with coach notes, colour-coded levels and guardian contacts.

2

Development plans

Short-term and season objectives per player and per team, with status and coach comments.

3

Physical testing

Eight standard tests with history and trends, recorded live for a whole group from a phone.

4

Drills & trainings

A shared exercise library with court diagrams, trainings built from it and a team calendar.

5

Match scouting

Two taps per action on a phone, live stats during the match and a report after it.

6

Stats & awards

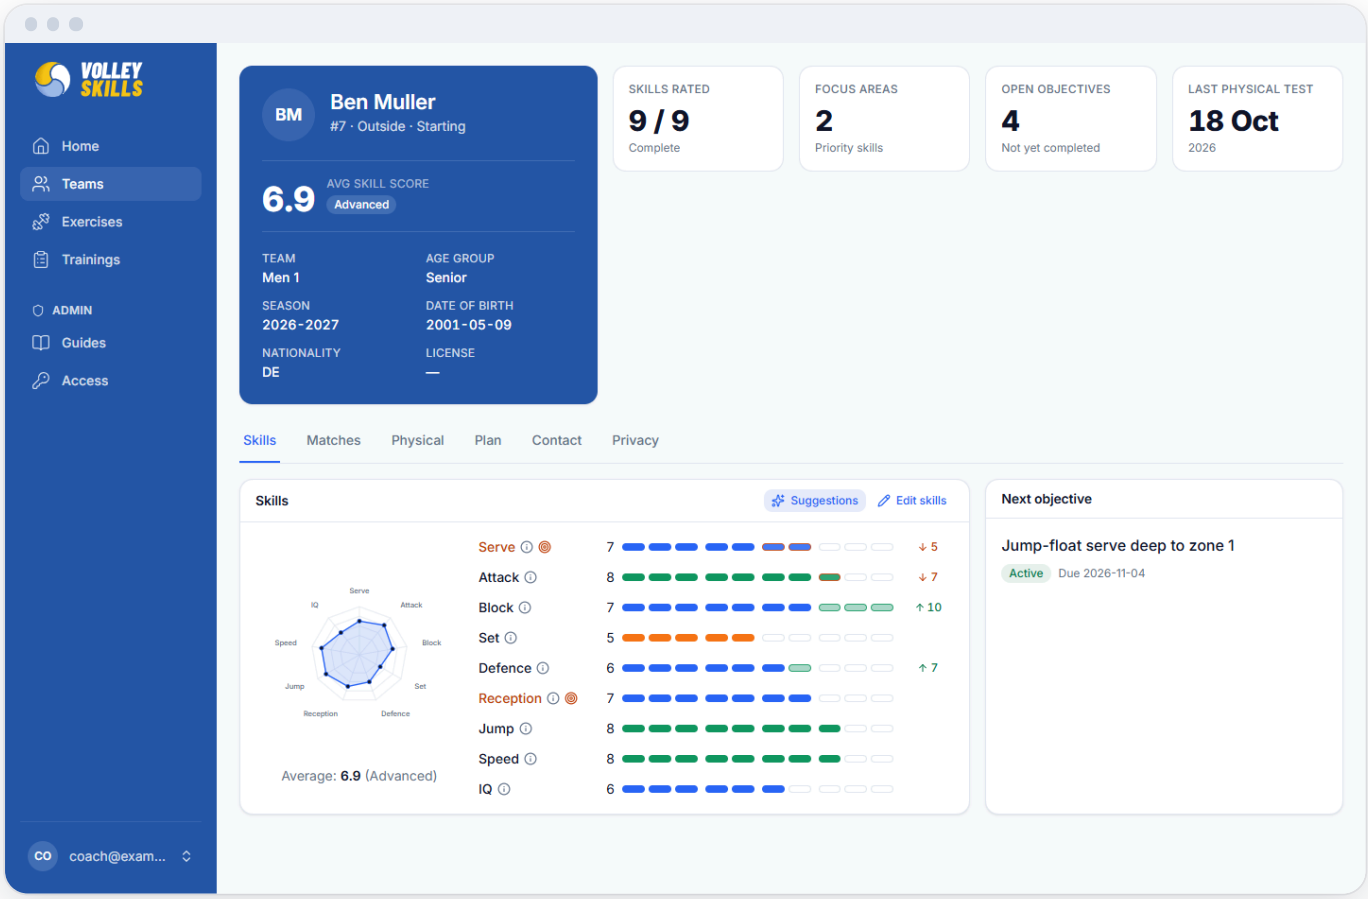

Season KPIs, trends and leaderboards, and award cards to celebrate with the team.

Made for Head and assistant coaches who run training and matches, and the club staff who look after several teams, from youth squads to the first team.

TEAMS & PLAYERS

Know every player, at a glance

Each team has a roster in lineup order. Each player has a card that holds everything a coach needs, and nothing ends up lost in a spreadsheet tab again.

A player card: average skill score, level, focus areas, open objectives and the latest physical test.

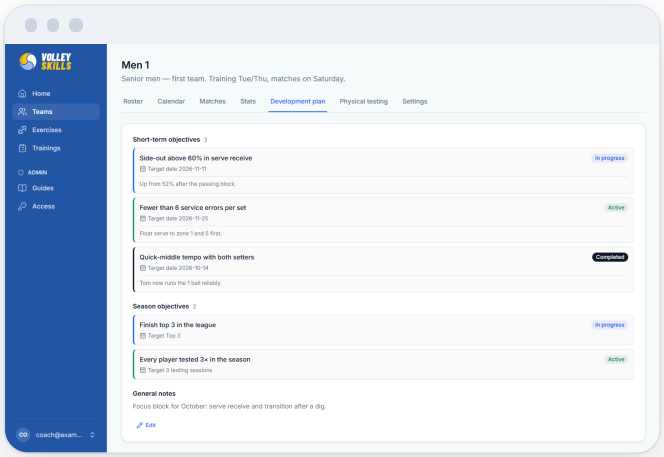

- **Nine skills scored 1–10**, from serve and reception to jump, speed and game IQ, each with a coach note and a priority flag.
- **One level, one colour.** The average maps to a level that reads the same everywhere in the app:

  Beginner · Developing · Advanced · Elite
- **Shared scoring guides** describe what a 3 or a 7 means for each skill, so every coach in the club scores the same way.
- **Rosters in lineup order** (setter, outside, opposite, middle, libero) with search, sorting and starters marked.
- **Contacts and guardians** in one place, with consent recorded per player.
- **Match history per player**: attack, serve and reception efficiency from every scouted match.
- **Bring your roster in** with a bulk import instead of retyping it.

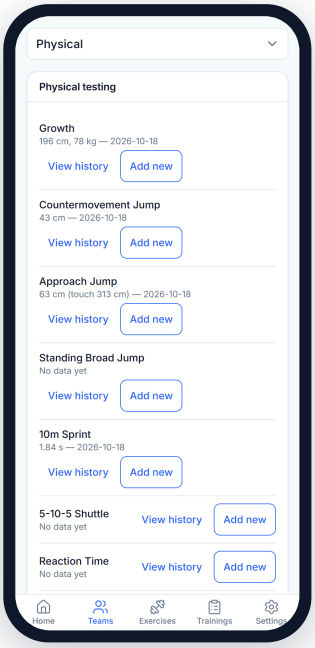

DEVELOPMENT & PHYSICAL TESTING

Set goals. Measure progress.

Turn what you see in training into objectives with dates, and back them up with physical tests that show how each player is growing.

- **Short-term objectives** with a target date, a status (active, in progress, attention, completed) and a coach comment.
- **Season objectives** for the bigger picture, for each player and for the team as a whole.

Eight standard tests, with history and trends

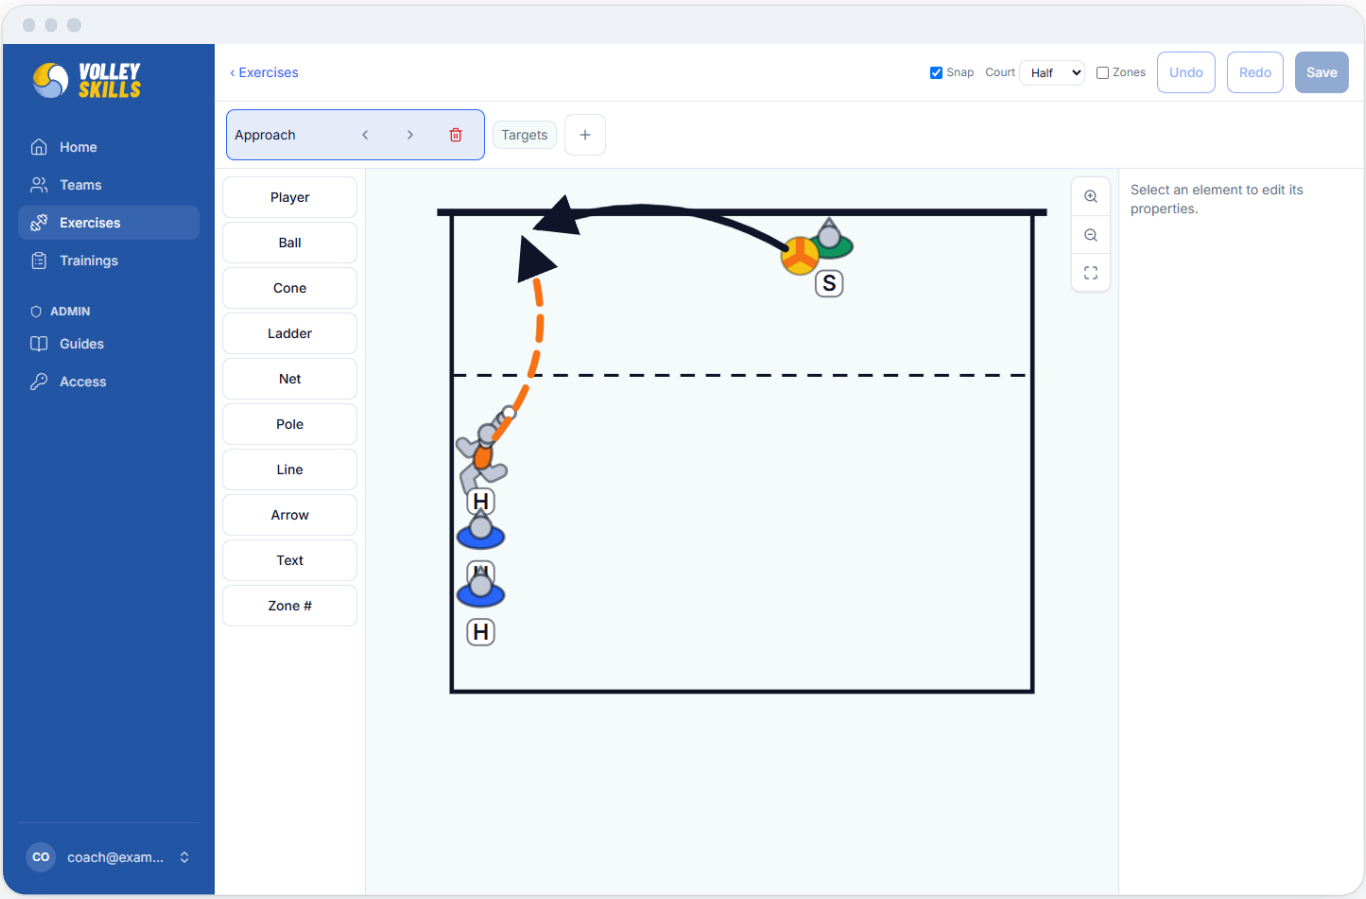

Growth	Countermovement jump	Approach jump	Standing broad jump
10 m sprint	5-10-5 shuttle	Reaction time	Strength

Live testing sessions. Test a whole group in the gym from one phone: pick the players, pick the test, and record results with the built-in stopwatches. Every result lands on the right player card.

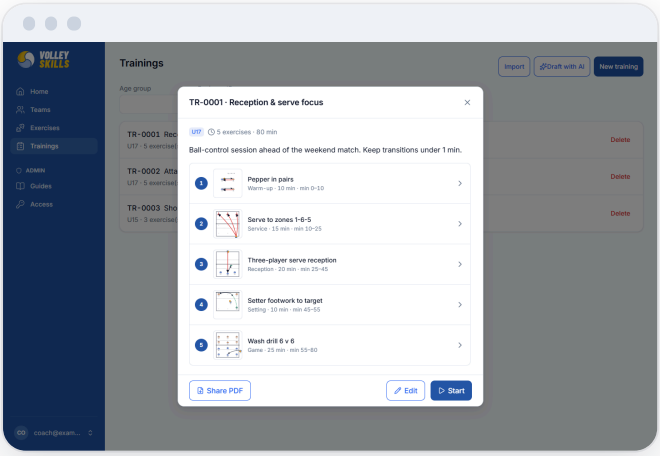

EXERCISES, DIAGRAMS & TRAININGS

Build better trainings, faster

The club keeps one shared library of exercises. Draw each drill on a court, combine drills into trainings, and put them on a team's calendar.

The court diagram builder: players, balls, cones, ladders, lines, arrows and text.

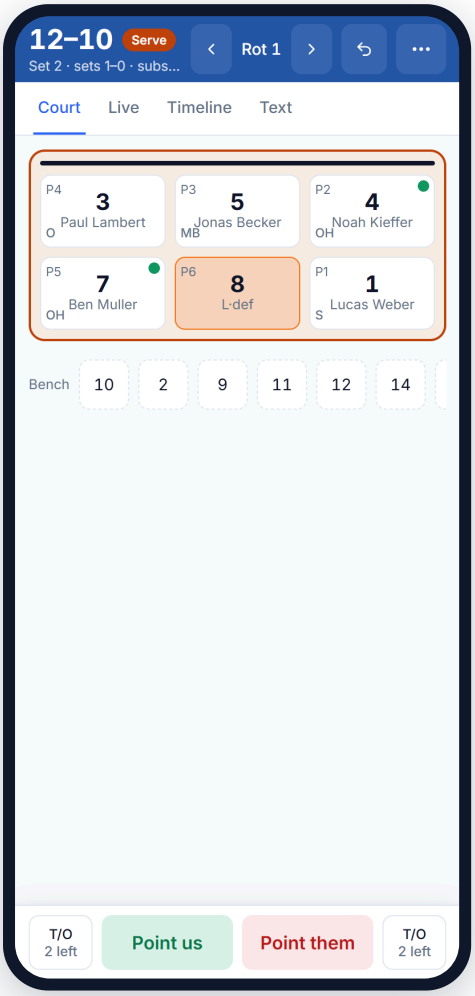

- **Trainings from ordered exercises**, with durations and a running clock, each with its own ID (TR-0001).
- **A calendar per team.** Assign trainings to dates; the home page shows the next seven days.
- **Share as a PDF** from a phone: the session plan, then a page per exercise with its diagram. Add notes for the players expected that day.
- **Draft with AI** (optional): describe the session you want and review the drafted exercises before anything is saved.

MATCH SCOUTING

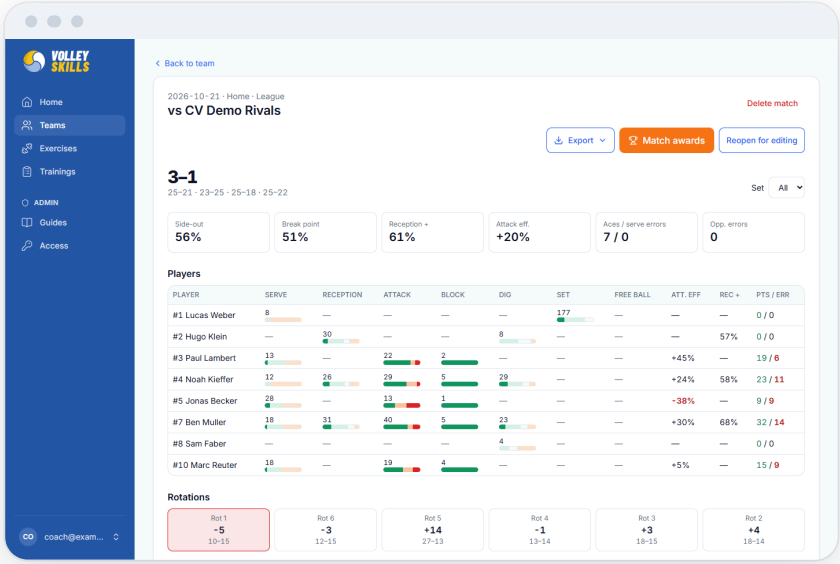

Scout live. Decide in the moment.

One person can scout a whole match from the bench, one-handed on a phone, and see who is struggling while there is still time to act.

Live scouting on a phone.

- **Tap the court.** Usually two taps per action: the player, then the grade. Rotations and the score follow on their own.
- **Live stats during the match**: side-out and break-point percentages, reception quality, and alerts when a player keeps making errors or the opponent goes on a run.
- **Fix mistakes in seconds** with undo, an editable rally-by-rally timeline and "insert a missed rally here".
- **Or just type it.** Describe the rallies in plain words and AI turns them into the same events. Player names are swapped for shirt numbers before anything leaves the device.
- **Bad gym Wi-Fi is fine.** Every action is saved on the device first and syncs when the connection comes back.

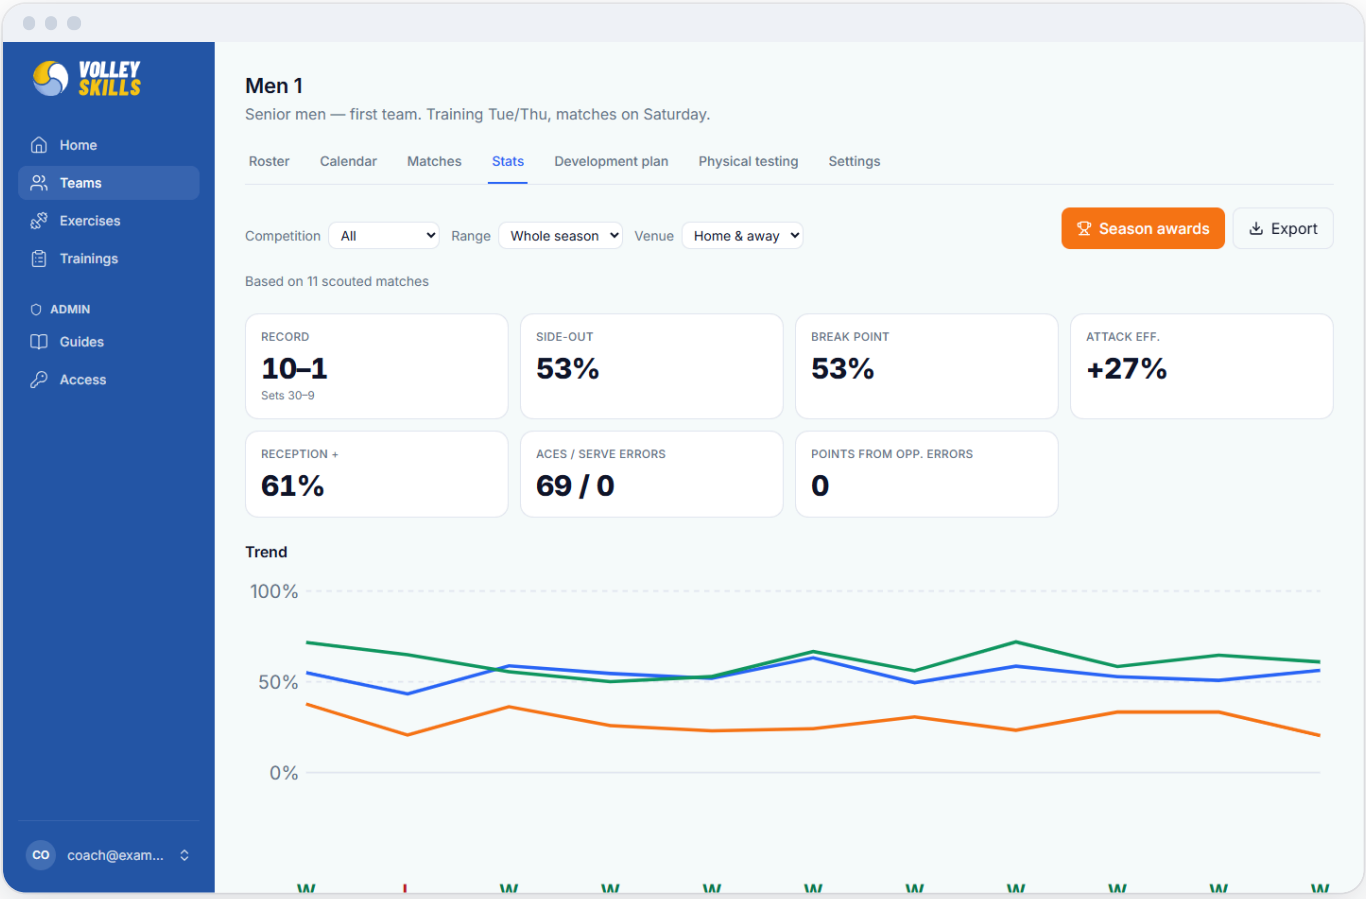

After the match: a report per player and per fundamental, rotations included, ready to export.

STATS & AWARDS

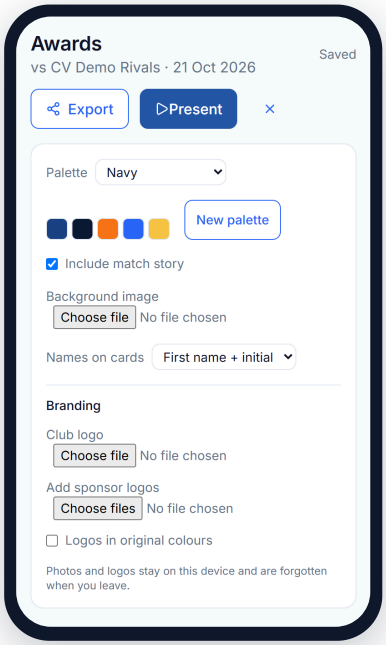

See the season. Celebrate it.

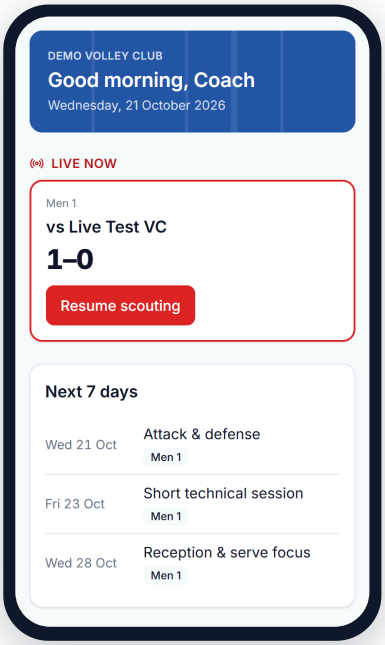

Every scouted match adds up into team statistics. At the end of a match or a season, turn them into awards the players will want to share.

The team Stats tab: record, side-out, break point, attack efficiency and the trend over the season.

- **Filter by competition, date range and venue**, and compare rotations, leaderboards and per-player tables.
- **Export** the numbers as PDF or CSV.
- **Season and match awards** such as top scorer, best server and MVP, picked from the stats with the coach's final say.
- **Present them full screen** as a story with a reveal for each award, then share the cards as images or a video.
- **Photos never leave the device.** Background removal for player cut-outs runs on the device itself.

BUILT FOR CLUBS

Safe for minors. Simple for staff.

Youth clubs hold data about children and their parents. Volley Skills is designed around that from the first line of code.

- **Access per team and section**
  Coaches only see the teams they work with. Library, trainings and guides each have their own editors. New people request access and an admin approves them.
- **No passwords to leak**
  Sign in with a one-time email link or a Google account.
- **No ads, no tracking**
  No analytics or third-party tracking scripts, ever. A plain-language privacy policy is public.
- **Data rights built in**
  Consent per player, data export for a player or a whole team, and deletion when someone leaves.
- **AI only if you want it**
  AI features are optional and use your club's own provider. Names are replaced by shirt numbers before sending.
- **Made for the gym**
  Works on phones, tablets and computers, in light or dark mode, and can be added to the home screen like an app.

VOLLEY SKILLS

Bring your club's season into one place.

Volley Skills is in early access. Ask for an invitation from the sign-in page, or write to us to get your club started.
